## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3727

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7-9 and 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown et al. (Brown).

Brown discloses a twin sheet thermoformed thermoplastic sleeve half (26) which defines a unitary box blank formed from plastics material and comprising a plurality of hinge elements (54) connecting and fused to a plurality of panels for forming sides of the box, the hinge elements being formed from a different plastics materials than the panels. The panels are plastic formed of two layers or sheets in a twin-sheet thermoforming process (see Fig. 4 cross section) and the hinge is plastic of a single layer (see Fig. 5 cross section). The panels are structural and load bearing. The hinge element plastic has greater toughness and less rigidity than the panel plastic. The hinge elements have projections (80) which protrude from the panels.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-6, 10 and 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown in view of Reuter.

Brown disclose the invention except for the materials of rubber modified polypropylene, propylene, polyethylene and rubber modified polyethylene for the hinge element and

Art Unit: 3727

polypropylene for the panels. Reuter teaches a lid which has flexible hinge portions, the entire lid is made of rubber modified polypropylene. Rubber modified polyethylene is a known material. It would have been obvious to modify the hinge elements to be polyethylene, polypropylene, rubber modified polypropylene or rubber modified polyethylene in order to provide a flexible material which is durable as well. It would have been obvious to make the panels polypropylene in order to provide a durable and easily cleanable surface.

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
